

September 16, 2003

Kay Gaudet, Acting Chief
Office of Management & Finance
Department of Health & Hospitals
Post Office Box 91030
Baton Rouge, LA 70821-9030

Dear Ms. Gaudet:

Pursuant to your request regarding the scope of practice for certified nurse practitioners (CNPs) performing certain CPT codes your request was studied by the Practice Committee on July 15, 2003. The Committee presented its recommendation to the Board of Nursing on September 12, 2003, and. After due deliberation, the Board adopted the following opinions:

That in reference to agenda item 6.2, that it is within the scope of practice of certified CNMs, WHNPs and FNPs to perform the following CPT codes:

J7300-Intrauterine copper contraceptive
J7302-Levonorgestrel-releasing intrauterine contraceptive system, 52 mg
11981-Insertion, non-biodegradable drug delivery implant
99234-Observation or inpatient hospital care (low complexity)
99235-Observation or inpatient hospital care (moderate complexity)
99236-Observation or inpatient hospital care (high complexity)

Note: In order for a CNP to perform Board approved procedures as designated by the specific CPT codes it must be within that said APRN's area of specialization and consistent with the APRN's collaborative practice agreement with the collaborative practice physician(s).

Contact me if you have any questions.

Sincerely,

Barbara L. Morvant, MN, RN
Executive Director, LSBN
