

Nursing Education Capacity and Nursing Supply in Louisiana

Louisiana State Board of Nursing Center for Nursing

Nursing Education Capacity and Supply in Louisiana 2010-2011

Executive Summary

This report analyzes trends in Louisiana's nursing education capacity and faculty supply using data from the Louisiana State Board of Nursing (LSBN) 2010-2011 School of Nursing annual reports which are submitted by pre-RN licensure programs and advanced practice registered nurse (APRN) programs in Louisiana. Data used to describe the size and characteristics of Louisiana's RN and APRN workforce (nursing supply) is taken from the annual licensure renewal applications that were submitted to LSBN on or before January 31, 2012. Listed below are some of the major findings obtained from the analysis of the data (a more extensive list of the major findings is located at the end of each of the reports) along recommendations that address the major findings.

Nursing Education Capacity

Major findings from the 2010-2011 Nursing Education Capacity report indicate:

- Beginning in 2008, there has been a steady decline in the number of qualified applicants applying to Louisiana's pre-RN licensure programs.
- Since 2008, there has been a 16% increase in the number of qualified applicants denied admission to Louisiana's pre-RN licensure programs.
- The top four reasons why qualified applicants are not admitted to Louisiana's pre-RN licensure programs are: 1) limited budgeted faculty positions; 2) a limited number of qualified faculty; 3) non-competitiveness in faculty salaries; and 4) lack of clinical specialty sites.
- Baccalaureate programs produced 51% of the graduates from pre-RN licensure programs, followed by 48% from Associate Degree Programs, and 1% from Diploma programs.
- Over the past year, there has been an overall decline in the number of students enrolled in Louisiana's APRN programs.
- Between 2010 and 2011, there has been a 22% decrease in the number of students enrolled in graduate nursing education programs and 13% decrease in the number enrolled in nursing administration programs.
- In 2010-2011, one hundred and fifteen (115) faculty members teaching in pre-RN licensure programs in Louisiana were former recipients of the Board of Regents nurse faculty stipends. Due to statewide budget cuts to higher education, funds were not available for stipends for graduate nursing students during the 2010-2011 annual report year.
- In 2010-2011, twenty faculty members left their teaching positions in graduate nursing programs in Louisiana for the following reasons: approved paid or unpaid leave (5); resignations (9); and retirement (6). This represents a 33% increase in graduate nurse faculty attrition since 2009-2010.

Recommendations:

- Enhancing nursing education capacity in Louisiana is essential if we are to meet the future nursing workforce needs in Louisiana.
 - Faculty positions must be made attractive to nurses considering pursuit of an advanced degree in nursing. Academic administrators and university trustees

should create salary and benefit packages that are market competitive to recruit and retain highly qualified academic and clinical nurse faculty (IOM Report on the Future of Nursing, 2011).

- Nursing education must remain a priority for colleges, universities, and legislators, even in tough economic times. Louisiana cannot afford to cut vacant nurse faculty positions.
- Private and public funders should collaborate, and when possible pool funds, to expand baccalaureate and graduate programs to enroll more students by offering scholarships and loan forgiveness, hiring more faculty, expanding clinical instruction through new clinical partnerships, and using technology to augment instruction (IOM Report on the Future of Nursing, 2011).
- Leaders in nursing education must come together to develop a statewide plan to address the recommendations from the Institute of Medicine's Report on the Future of Nursing which focuses on the need to increase the proportion of nurses with a baccalaureate degree to 80 percent by 2020 and double the number of nurses with doctorates. This will need to be accomplished through collaborative efforts between universities, community colleges, and health care organizations.
- A data-driven approach to sustaining or expanding Louisiana's nursing education capacity is needed to maximize the state's use of scarce fiscal, human, and clinical resources.

Nursing Supply

Major findings from the 2011 Nursing Supply report indicate:

- In 2011, 57,788 nurses held a license to practice as a RN in Louisiana which reflects a 4% increase in the number of nurses licensed to practice in Louisiana over the last year, and a 15% increase over the past 5 years.
- The average age for RNs licensed in Louisiana in 2011 was 44 years, whereas, nationwide the average age for RNs is 47 yrs (BHPr., 2010).
- The two age groups with the greatest increase in numbers over the past five years were the youngest RNs (less than 30 years) and the oldest (60 years or greater).
- > Twenty-six percent of licensed RNs in Louisiana were 50 years or older in 2011.
- Over one third (35%) of Louisiana's RN workforce plans to be in the workforce for 10 years or less.
- > There was a 21% increase since 2010 in the number of licensed RNs that retired.
- In 2011, the racial make-up of RN workforce in Louisiana was 80% White, 14% Black, 1% Hispanic, 1% Asian, .4% Native American, and .4% other race.
- Louisiana continues to fall slightly below the nation in terms of the percentage of its RN workforce that is prepared at the baccalaureate or higher degree level (Louisiana-49.5%; U.S.-50%).
- Since 2007, there has been an 88% increase in the number of RNs employed in physician's offices and a 60% increase in the number employed in long-term care facilities.
- There has been a 30% increase in the number of APRNs holding a license to practice in Louisiana since 2007.
- There was a 55% increase in the number of NPs licensed and residing in Louisiana between 2007 and 2011 and a 12% increase between 2010 and 2011.

Recommendations:

- Utilize state level nursing supply, demand and education data to forecast future RN workforce needs in an effort to avoid a severe nursing shortage in the future.
- Strategic efforts must be put into place to prepare for the exodus of 33% of the current RN workforce over the next ten to fifteen years due to retirement and to retain new graduate nurses in the profession for the long term.
 - The creation of partnerships between nursing education and nursing practice in establishing nurse residency programs for new graduates has proven to increase retention rates for new graduates.
 - It has been reported that new graduates are having difficulty finding positions in hospitals, therefore new graduates should be informed of employment opportunities in other healthcare settings such as long-term care facilities.
 - Appropriate emphasis on geriatric and long-term care in school, as well as formalized orientations to the field from employers is needed.
 - In an effort to retain older experienced nurses that possess years of organizational experiential knowledge that can be shared with younger nurses, efforts must be made to extend the work-life of older nurses through workplace and role redesign (Florida Center for Nursing, 2010).
- Health care organizations should encourage nurses with associate's and diploma degrees to enter baccalaureate nursing programs by offering tuition reimbursement, creating a culture that fosters continuing education, and provide a salary differential and promotion.
- With the implementation of the Affordable Care Act and the tremendous need for primary care providers in Louisiana, barriers to practice for all nurses must be identified, addressed, and eliminated with the ultimate goal being to provide high quality, patientcentered, cost-effective care to the citizens of our state.

NURSING EDUCATION CAPACITY IN LOUISIANA 2010-2011

It is the charge of the Louisiana State Board of Nursing (LSBN) to closely monitor all nursing programs in the state that prepare nursing students for initial licensure as a registered nurse (RN), as well as those graduate programs that prepare RNs as advanced practice registered nurses (APRNs). It is the responsibility of LSBN to ensure that these programs are preparing safe and effective practitioners to care for the citizens of Louisiana. Deans and Directors of Pre-RN Licensure programs in Louisiana must submit an annual report to LSBN in the fall of each year to demonstrate ongoing compliance with all rules and regulations relative to nursing education. Information such as the number of applicants accepted into the programs each year, the number of students enrolled in clinical nursing courses, the number of graduates and the qualifications of faculty teaching in the programs is used to determine RN education capacity. An analysis of the data obtained from the 2010-2011 annual reports submitted by undergraduate and graduate nursing programs in Louisiana was used to develop the Nursing Education Capacity Report.

Pre-RN Licensure Programs in Louisiana

LSBN approved twenty-six (26) pre-RN licensure programs during the 2010-2011 report year (Table 1). One (1) diploma program, twelve (12) associate degree programs (one less from last year – Nicholls no longer has an AD program), and thirteen (13) baccalaureate programs prepare students to become candidates for initial RN licensure in Louisiana (see Appendix A for a List of LSBN Approved Nursing Education Programs).

Table 1. Pre-RN Licensure Programs in LA (2011)

Applicants and Admissions to Pre-RN Licensure Programs in Louisiana

The pool of qualified applicants applying to pre-RN licensure programs in Louisiana in 2010-2011 decreased by 1% over the last year (Table 2). Beginning in 2008, there has been a steady decline in the number of qualified applicants applying to pre-RN licensure programs - dropping from 5,110 applicants in 2008 to 4,705 in 2011 reflective of an 8% decrease in the last 4 years. A 4% decrease in the number of qualified applicants admitted to pre-RN licensure programs in the past year was also noted. In the current report year, 3,252 of the 4,705 qualified applicants (69%) were admitted, in comparison to 71% that were admitted in 2009-2010. Approximately 31% of the qualified applicants were denied admission to Louisiana's pre-RN licensure programs in 2010-2011 (see Appendix B1 for a summary report of applicants and admissions to pre-RN Licensure programs and Appendix B2 for a breakdown of applicants and admissions by programs).

Report Year	Qualified Applicants	No. and % of Qualified Applicants Admitted to Pre-RN Licensure Programs		No. and % of Qualified Applicants Not Admitted to Pre-RN Licensure Programs

Table 2. Applicants and Admissions for Pre-RN Licensure Programs in LA(2007-2011)

Applicants and Admissions to Pre-RN Licensure Programs in Louisiana by Program Type for the 2010-2011 Annual Report Year

Although there were more students applying to Associate Degree programs in 2011 (Table 3a), more students were actually admitted to Baccalaureate programs in Louisiana over the past 5 years (Table 3b). During the 2011 report year, there were 2,393 applications submitted to Louisiana's Associate Degree programs and 2,221 submitted to Baccalaureate programs, whereas, 78% (1,741) of the applicants applying to Baccalaureate programs were admitted and only 61% (1,466) of the applicants applying to Associate Degree programs were admitted, resulting in a 6% decrease in the number of students admitted to Associate Degree programs and a 2% decrease in those admitted to Baccalaureate programs between 2010 and 2011. Forty-nine percent of qualified applicants pursuing a Diploma in nursing were admitted in 2011 compared to 41% in 2010 (see Appendix B2 for a breakdown of applicants and admissions by programs).

Over the last four years (2008-2011) there has been a 12% decrease in the number of admits to diploma programs, a 10% decrease in admits to Associate degree programs, and no relative change in the number of students admitted to Baccalaureate programs leading to an overall 5% decrease in the number of qualified applicants admitted to pre-RN licensure programs in Louisiana during this time period.

Reasons Why Qualified Applicants are not Admitted to Pre-RN Licensure Programs (2010-2011 Annual Report Year)

The top four reasons identified by Louisiana's pre-RN licensure programs as to why qualified applicants are not admitted has remained unchanged: 1) limited budgeted faculty positions; 2) limited number of qualified faculty; 3) non-competitiveness in faculty salaries; and 4) lack of clinical specialty sites (Table 4). The ranking for these reasons did change in the 2010-2011 report year placing a lack of qualified faculty as number 2 instead of number 3, and non-competitive salaries as number 3 instead of number 2. The lack of available classroom space, clinical sites, and skills lab space were ranked numbers 4, 5 and 6, respectively.

No. 3	Faculty Salary Not Competitive
No. 4	Lack of Clinical Specialty Sites

Enrollment in Pre-RN Licensure Programs in Louisiana

In 2011, 15,988 students enrolled in post-secondary education settings in Louisiana declared nursing as their major (Table 5), which reflects an 8% increase from the previous report year (14,779 in 2010). However, there was a 1% decrease in the number of students enrolled in clinical nursing courses in the current report year (see Appendix B1 for a summary report on enrollments in pre-RN Licensure programs).

Gender of Students Enrolled in Pre-RN Licensure Programs in Louisiana

There was a 13% decrease in the number of males enrolled in Pre-RN licensure programs in 2011 compared to a 9% increase in 2010. Females represented 86% of students enrolled in pre-RN licensure programs in Louisiana in 2011 (85% in 2010), while males represented 14% (15% in 2010) (Table 6).

Racial Distribution of Students Enrolled in Pre-RN Licensure Programs in Louisiana

In 2011, 67% (4,126) of the students enrolled in pre-RN licensure programs in Louisiana were White, which represented a 6% increase in number over the past year. The number of Blacks enrolled in Louisiana's pre-RN licensure programs decreased by 3% (a difference of 47 students) in 2011. In contrast, there was an 18% increase in the number of Asian students enrolled in Louisiana's pre-RN licensure programs (Table 7). Of the 226 students that reported their ethnicity as *Other*, 23 were self-reported as Native American/Alaskan Natives.

Table 7. Racial Distribution of Students Enrolled in Pre-RN Licensure Programs in LA(2007-2011)

Graduates from Pre-RN Licensure Programs in Louisiana

There were a total of 2,281 graduates from pre-RN licensure programs from Louisiana's schools of nursing in 2011 which is forty-two more graduates than the previous report year. Fifty-one percent of the graduates came from baccalaureate programs (57% in 2010), 48% came from associate degree programs (41% in 2010), and 1% from the only diploma program in the state (2% in 2010). There was a noted shift in the distribution of graduates across the various programs. The number of graduates from baccalaureate programs decreased by 9%, whereas, the number of graduates from associate degree programs increased by 18% (Table 8). The number of diploma graduates went from 39 in 2010 to 30 in 2011 which reflects a 23% decrease over the previous year (see Appendix B1 for a summary report of RN graduates and Appendix B6 for the number of RN Graduates per program for 2011).

Table 8. Graduates of Pre-RN Licensure Programs in LA According to Program Type(2007-2011)

Report Year	Total No. of RN Graduates from Pre-RN Licensure	Diploma		Associate		Baccalaureate	
	Programs	No.	%	No.	%	No.	%
2011	2,281	30	1%	1,084	48%	1,167	51%

Pre-RN Licensure Students in Louisiana Performance on the NCLEX-RN

In 2011 there were a total of 2,294 RN candidates (2,271 in 2010) sitting for the National Council Licensure Examination for Registered Nurses (NCLEX-RN) exam with 2,082 (90.76%) passing on the first take (Table 9). The overall national passage rate on the NCLEX-RN for 2011 was 87.90% compared to 87.42 in 2010 (see Appendix B7 for NCLEX-RN results by program).

1 10grams m Litt on		<i>y</i> 1 , 2011 December 51, 2011)			
Program Type	No. Taking	No. Passing	% Passing		
Diploma	28	28	100%		
Associate Degree	1,104	1,001	90.67		
Baccalaureate Degree	1,162	1,053	90.62		
Grand Total	2,294	2,082	90.76		

Table 9. Performance of First-Time Candidates Graduating from Pre-RN Licensure
Programs in LA on NCLEX-RN (January 1, 2011 – December 31, 2011)

Note: The National Average Passage Rate on the NCLEX-RN Examination was 87.90% for 2011.

The passage rate on the NCLEX-RN for graduates from Louisiana's pre-RN licensure programs has exceeded that of the nation for the previous 5 years (Table 10) in spite of the higher passing standard implemented in April 2010 by the National Council of State Boards of Nursing. There was a 2% decrease in the NCLEX-RN passage rate for Associate Degree programs (1,001/1,104 Passing) in 2011, a 1% increase in the passage rate for Baccalaureate programs (1,053/1,162 Passing) and a 6% increase for Louisiana's one Diploma program (28/28 Passing). There was an 11% decrease in the number of graduates from baccalaureate programs passing the NCLEX-RN exam and an 18% increase in the number of graduates from Associate Degree programs. There was a 20% decrease in the number of graduates from the state's only Diploma nursing program.

Graduate Nursing Programs in Louisiana

Advanced Practice Registered Nurse Education in Louisiana

APRN Programs in Louisiana

There are seven Graduate Nursing Programs in Louisiana offering a degree as an Advanced Practice Registered Nurse (APRN). Six of the seven programs offer the Nurse Practitioner (NP) role; four the Clinical Nurse Specialist (CNS) role; and two the Certified Registered Nurse Anesthetist (CRNA) role (see Appendix A for a list of LSBN Approved Graduate Nursing Programs). There are currently no programs offering the Certified Nurse Midwife (CNM) role in Louisiana (Table 11).

Enrollment in APRN Programs in Louisiana

Over the past year there has been an overall decline in the number of students enrolled in Louisiana's APRN programs. Between 2010 and 2011 there was a 3% decrease in the number of students enrolled in Louisiana's NP programs, a 72% decrease in those enrolled in CNS programs, and a 29% decrease in those enrolled in CRNA programs. However, over the past five years there has been a 68% increase in the number of students enrolled in NP programs in Louisiana, in contrast to a 67% decrease in CNS programs and a 23% decrease in students enrolled in Louisiana's CRNA programs (Table 12).

Report Year	No. of Students Enrolled in NP Programs	No. Students Enrolled in CNS Programs	No. Students Enrolled in CRNA Programs	Total No. Students Enrolled in APRN Programs

Table 12. Enrollment in APRN Programs in LA (2007-2011)

Gender of Students Enrolled in APRN Programs in Louisiana

Over the past year there has been a 33% decrease in the number of male students enrolled in Louisiana's APRN programs as well as a 4% decrease in the number of female students (Table 13). However, female enrollment continues to be the predominating gender in APRN programs in Louisiana.

Table 13. Gender of Students Enrolled in APRN Programs in Louisiana (2009-2011)

Ethnicity of Students Enrolled in APRN Programs in Louisiana (2010 – 2011)

Over the last year there was a 7% decrease in the number of White and Black students enrolled in APRN programs across the state, as well as a 5% decrease in the number of Hispanic students. In contrast, there was a 17% increase in the number of Asian students (+2). In 2011, the racial make-up of students enrolled in Louisiana's APRN programs was 72% White, 23% Black, 2% Hispanic, 2% Asian and 1% other race (Table 14).

Graduates from APRN Programs in Louisiana in 2011

In the 2010-2011 report year, there were a total of 279 graduates from Louisiana's APRN programs (Table 15) which represents a 13% increase from 2009-2010 (see Appendix C for Enrollment and Graduates from APRN Programs in Louisiana). The majority of the graduates were from NP programs (72%) and CRNA programs (26%). Two-percent of the graduates were from CNS programs.

Performance of APRN Graduates on Certification Exams

Certification examinations taken by graduates from Louisiana's APRN programs include, but are not limited to the American Nurses Credentialing Center (ANCC), the American Academy of Nurse Practitioners (AANP), the Council on Certification for Nurse Anesthetists (CCNA), the National Certification Corporation (NCC), the Pediatric Nursing Certification Board (PNCB), and the American Association of Critical Care Nurses (AACCN). In 2010-2011, 270 APRN candidates sat for their respective certification exams. Two hundred and sixty-two (262) candidates successfully passed their certification exams resulting in a 97% passage rate for the state (Table 16).

<u>Graduate Nursing Programs in Louisiana Offering Non-Licensure Degrees in Nursing Education and Nursing Administration</u>

Six of the seven Graduate Nursing Programs in Louisiana offer a Masters Degree in Nursing Education and a Masters Degree in Nursing Administration (Table 17). Currently, LSBN only has jurisdiction over graduate nursing programs that lead to the APRN degree which require licensure, and not those that lead to a Masters in Nursing Education or Nursing Administration. In order to better inform policy makers about nursing workforce demand and to be able to predict future nursing workforce needs, it will be important to identify how many nurses are being prepared to take on faculty positions in Louisiana, as well as leadership positions in hospitals and other clinical settings. A major limitation related to reporting on enrollment of Louisiana's RNs in APRN and non-licensure Graduate Nursing programs is the inability to track those nurses that are enrolled in online or out-of-state programs that do not come under the jurisdiction of the Board of Nursing.

Admission to Non-Licensure Graduate Nursing Programs in Louisiana in 2010-2011

In the 2011 report year, a total of 304 RN students were admitted to Louisiana's non-licensure graduate programs in Nursing Education and Nursing Administration (Table 18). The majority of the students (271) were admitted to Nursing Administration programs across the state which represents a 10% decrease when compared to 2010. Nursing Education programs admitted 33 graduate nursing students during the 2011report year, which represents a 23% decrease from the previous year. Of the 883 students admitted to graduate nursing programs across the state, 579 (66%) were admitted to APRN programs, 271(31%) were admitted to Nursing Administration programs in the 2010-2011 report year.

Table 18. Admissions to Non-Licensure Graduate Nursing Programs in Louisiana(2010-2011)

Enrollment in Non-Licensure Graduate Nursing Programs in Louisiana

In the 2011 report year, a total of 549 RN students were enrolled in Louisiana's non-licensure graduate programs in Nursing Education and Nursing Administration (Table 19). The majority of the students (494) were enrolled in Nursing Administration programs across the state. There were 55 RN students enrolled in the state's Nursing Education programs during the 2011 report year. Of the 1,424 students enrolled in graduate nursing programs across the state, 875 (61%) were enrolled in APRN programs, 494 (35%) were enrolled in Nursing Administration programs, and 55 (4%) were enrolled in Nursing Education programs during the 2010-2011 report year. Between 2010 and 2011, there was a 22% decrease in the number of students enrolled in nursing education programs and a 13% decrease in the number enrolled in nursing administration programs.

Graduates from Non-Licensure Graduate Nursing Programs in Louisiana

In the 2010-2011 report year, there were a total of 222 graduates from Louisiana's non-licensure graduate nursing programs which represents a 12% decrease from the previous report year (Table 21). The majority of the graduates (194) were from Nurse Administration Programs and 28 were from Nursing Education programs.

Nursing Faculty in Louisiana

To gauge the current level of demand for nurse faculty, data was obtained from the 2010-2011 Annual Reports submitted to LSBN by the Deans and Directors of pre-RN licensure programs and APRN programs in the state of Louisiana.

Faculty Teaching in Pre-RN Licensure Programs

Deans and Directors were asked to report the number of filled and vacant faculty positions in their pre-RN licensure programs from October 16, 2010 to October 15, 2011. These numbers are depicted by program type and full vs. part-time positions in Table 22.

There were a total of 560 budgeted full-time nurse faculty positions reported by Louisiana's pre-RN licensure programs in 2010-2011 compared to 536 in 2009-2010 which reflects a 4% increase. The budgeted positions were filled with 533 full-time and 192 part-time faculty members, a total of 725 faculty compared to a total of 742 in 2009-2010. Thus, in 2011 there were more budgeted full-time faculty positions reported by pre-RN licensure programs when compared to the previous year (+24), but less full and part-time faculty employed (-17) which reflects a 2% decrease in the number of faculty. Sixty-four faculty positions were funded from grants, capitation funds, additional appointments, and/or other funding sources compared to 17 positions in 2010, a 276% increase.

Prog Ty		Filled Faculty Positions		Nurse Faculty Positions Funded	Number of Nurse Faculty Teaching in Louisiana's Pre-RN
		Full-time	Part-time /Adjunct	from other Sources	Licensure Programs for the 2010-2011 Report Year
Diplon	na (1)	11	1	0	12
ADN	(12)	192	62	23	254
BSN	(13)	330	129	41	459
Total	(26)	533	192	64	725

 Table 22. Filled Nurse Faculty Positions in Pre-RN Licensure Programs in LA (2010-2011)

Vacant Nurse Faculty Positions

There were a total of 27 full-time vacant nurse faculty positions reported by Deans and Directors in the current report year, compared to 32 in the previous report year (Table 23). The majority (15) of vacant full-time nurse faculty positions were reported by Louisiana's associate degree programs, followed by 12 vacant positions reported by baccalaureate programs. The number of vacant full-time faculty positions will often determine the number of part-time positions needed. Many schools do not budget positions for part-time instructors, instead they are hired as needed.

Table 23. Vacant Nurse Faculty Positions Pre-RN Licensure Programs in LA(2010-2011)

Program Type	Vacant Nurse Faculty Positions
Diploma	0
ADN	15
BSN	12
Total	27

New Nurse Faculty Appointments, Exceptions and use of Preceptors

A total of 82 new faculty appointments were reported by pre-RN licensure programs during the 2010-2011 report compared to 71 in the previous year, a 15% increase in the number of faculty appointments (Table 24).

Faculty exceptions are granted to pre-RN licensure programs upon approval of the Board for a pre-approved time period. According to LSBN Rules and Regulations, Title 46, Part XLVII, Chapter 35, No. 3515 B.8, the number of faculty exceptions shall not exceed 20 percent of the number of full-time nurse faculty employed (not FTE) in the program. The need for faculty exceptions is indicative of the lack of available qualified nurse faculty. The number of faculty exceptions requested by pre-RN licensure programs went from 56 in 2009, to 44 in 2010 and 40 in 2011, which represents a 29% decrease in the number of faculty exceptions utilized by pre-RN licensure programs over the last two years.

Preceptors are valuable resources in nursing education. Preceptors are used only during the last two academic semesters of a baccalaureate program and during one of the last two semesters of a diploma or associate degree program (LSBN Rules and Regulations, Title 46, XLVII, Chapter

35, No.3541B). In preceptor-student relationships, nursing faculty retain the responsibility for selecting, guiding and evaluating student learning experiences with input from the preceptor. In 2010, there were 968 preceptors used by pre-RN licensure programs and 1,190 in 2011 which reflects a 23% increase in the number of preceptors used by pre-RN licensure programs.

Program Type	No. of New Faculty Appointments	No. of Faculty Exceptions	Preceptors
Diploma (1)	2	1	0
ADN (12)	23	15	398
BSN (13)	57	24	792
Total (26)	82	40	1,190

 Table 24. New Faculty Appointments, Exceptions and use of Preceptors

Nursing Faculty Attrition

Faculty attrition due to faculty leave, resignation, retirement, death or termination contributes to an ongoing demand for nurse faculty (Table 25). During the 2010-2011 annual report year, a total of 15 faculty went on leave in comparison to 5 from the previous report year (a 200% increase). There were a total of 47 resignations, which is no change from the previous year, 18 retirements (19 in 2010), and 19 terminations (23 in 2010).

Program		No. of Faculty on	No. of Faculty	No. of Faculty	
Туре		· Leave	Resignations	Retirement/Termination

Total	(26)	15	47	37 (18 Retirements/ 19 Terminations)	

Table 25. Faculty Attrition: Leave, Resignation, and Retirement/Termination

Educational Preparation of Nurse Faculty

The Institute of Medicine Report on the Future of Nursing: Leading Change, Advancing Health recommends that the proportion of nurses with a baccalaureate degree be increased to 80% and the number of nurses with a doctorate be doubled by 2020 (IOM Report, 2011). According to the Carnegie Study (Benner, Sutphen, Leonard and Day, 2009), in order to meet the projected shortages for registered nurses, nursing education programs must increase their capacity by approximately 90%. The educational preparation of nursing faculty is essential. In order to properly educate the next generation of RNs, nurse faculty must be prepared to teach nursing students how to care for clients with complex diagnoses and treatment plans; be familiar with essential principles of teaching and learning; be able to appropriately use the newest teaching learning healthcare technology; and have the ability to engage nursing students in the teaching-learning process.

The Southern Association of Colleges and Schools (SACS), require that at least 25 % of nursing course hours in a Baccalaureate Nursing program be taught by faculty members holding the terminal degree (2010). In 2011 approximately 16% (122) of the faculty teaching in pre-RN licensure programs were prepared at the doctoral level, 79% (617) were Masters prepared, and

5% (40) reported that their highest degree in nursing was a baccalaureate degree (Table 26). This represents a 16% increase in the number of faculty prepared at the doctoral level, a 4% increase in those prepared at the Masters' level, and a 9% decrease in faculty prepared at the BSN level.

Table	Table 20. Educational Treparation of Faculty (2010-2011)

Note: Total = 779

Board of Regents Nursing Faculty Stipends

According to the 2010-2011 annual reports from pre-RN-licensure programs, 115 nurse faculty employed in pre-RN licensure programs in Louisiana were recipients of the Board of Regents (BOR) Nursing Faculty Stipends, an increase of 10 nurse faculty when compared to the 2009-2010 report year (Table 27). Due to statewide budget cuts to higher education, funds were not available for stipends for graduate nursing students during the 2010-2011 annual report year.

Table 27.	Board of	Regents F	Faculty Sti	pend	Recip	ients

Stipends Recipients (Masters and Doctorate)			

Nurse Faculty Salaries

Noncompetitive salaries for nursing faculty has been consistently cited as one of the major reasons why there are limited numbers of qualified faculty available to teach in Louisiana's pre-RN licensure programs. Noncompetitive salaries leads to an inadequate number of filled nurse faculty positions which is cited as a major reason for denying admission to qualified students (Maloney and Burns, 2006). According to the American Association of Colleges of Nursing (AACN, 2012), the average salary of a NP, across settings and specialties, is \$91,310 compared to \$72,028 for a master's prepared faculty. The higher compensation in clinical and private-sector settings is luring current and potential nurse educators away from teaching (AACN, 2009). Joynt and Kimball (2008), authors of a white paper entitled Blowing Open the Bottleneck: Designing New Approaches to Increase Nurse Education Capacity stated "While nursing faculty compensation adjustments alone will not solve the nursing education capacity problem, the value of the educators must be acknowledged and rewarded in order to move forward"(p.12).

The Deans and Directors of pre-RN licensure programs in Louisiana reported the average salaries of nursing faculty according to the rankings of instructor, assistant professor, associate professor, and professor. The Southern Regional Education Board (SREB) mean salary for full-time instructional faculty teaching in nursing programs in four year colleges or universities in

Louisiana was \$91,275 for Professors, \$68,557 for Associate Professors, \$58,067 for Assistant Professors and \$42,506 for Instructors, with the average salary being \$65,909 (SREB, 2012). Although there was an increase in mean salaries for all levels of faculty teaching in pre-RN licensure programs in Louisiana in the 2010-2011 report year when compared to the 2009-2010 annual report year, mean faculty salaries for Assistant Professors, Associate Professors and Professors in Louisiana still fall below the SREB mean for four year public colleges (Table 28).

Faculty Role/Rank	Instructor	Assistant	Associate	Professor
•		Professor	Professor	
2011	\$50,208	\$56,744	\$64,993	\$93,177
2010	\$48,801	\$55,839	\$61,917	\$74,687
1 Year Variance	<u>↑</u> 3%	<u>↑2%</u>	↑5%	↑25%

 Table 28. Mean Salaries for Nursing Faculty (2010-2011)

Note: Salaries in terms of length of appointment (9 month, 10 month, or 12 month) could not be determined based on information provided in the annual report.

Age Ranges for Nurse Faculty

Aging nurse faculty has to be addressed when planning for a projected nursing shortage. The literature contends that younger nurses tend to choose practice roles over faculty roles (Joynt, and Kimball, 2008). In 2010-2011 over a third (39%) of the nurse faculty in Louisiana were between 51 to 60 years of age and 28% (176) were 41 to 50 years of age. Fifty-four percent (54%) of nursing faculty teaching in Louisiana's pre-RN licensure programs are 51 years of age or older (Table 29). "The average age of nurse faculty at retirement is 62.5 years with a wave of retirements expected within the next 10 years (AACN, 2012).

Age Category	No. of Faculty		No.	of Faculty	No. of Faculty

Table 29. Age Ranges for Nurse Faculty (2009-2011)

Nurse Faculty Teaching in Graduate Nursing Programs in Louisiana

Educational Preparation of Nursing Faculty Teaching in Graduate Nursing Programs in Louisiana

Faculty teaching in Graduate Nursing programs in Louisiana must have a minimum of a Masters Degree in Nursing (LSBN Rules and Regulations Title 46 Part XLVII Chapter 45, 4509 G 2.c)

although most accrediting bodies prefer graduate nursing faculty have a doctorate either in nursing or in a related field outside of nursing. In 2010-2011 73% (105) of the faculty teaching in Louisiana's graduate nursing programs held an earned doctorate which is relatively little change from the 2009-2010 report year (74% or 108 in 2009-2010) (Table 30). The Masters was the highest degree held by a little over one-fourth (27%) of the 144 faculty teaching in graduate nursing programs in Louisiana in 2011. These individuals possessed credentials and/or expertise in an advanced practice specialty area that was recognized by both LSBN and national accrediting bodies.

Table 30. Educational Preparation of Faculty Teaching in Graduate Nursing Programs

Filled and Vacant Nurse Faculty Positions in Graduate Nursing Programs in Louisiana

Deans and Directors of Louisiana's graduate nursing programs were asked to submit the number of budgeted full-time faculty positions that were filled for the current report year. There were 54 filled full-time nurse faculty positions reported statewide which reflects a 25% decrease in the number of filled full-time nurse faculty positions in Louisiana's graduate nursing programs since 2009-2010. The number of full-time and part-time faculty filling the 54 budgeted positions changed very little since 2010 (Table 31). Seven (7) nurse faculty positions were reported as being vacant (2 less than 2010) and there was no change in the number of faculty positions funded from other sources (e.g., grants, capitation funds) since the previous report year.

Report Year	Number of Budgeted Nurse Faculty Positions Filled	Number of Full –time and Part-time Faculty Teaching in Graduate Nursing Programs	Nurse Faculty Positions Funded from other Sources	Vacant Nurse Faculty Positions	No. of New Faculty Appointments

 Table 31. Faculty Positions in Graduate Nursing Programs in LA (2009-2011)

Graduate Nursing Faculty Attrition

A total of 20 faculty left their teaching positions in graduate nursing programs in Louisiana in 2011 for one of the following reasons: approved paid or unpaid leave (5), resignations (9), and retirement (6) (Table 32). This represents a 33% increase in overall faculty attrition since 2010 -

a 400% increase in the number of faculty on leave and an 80% increase in faculty resignations. Six (6) graduate faculty retired in 2010 and 6 retired in 2011.

NURSING EDUCATION CAPACITY IN LOUISIANA MAJOR FINDINGS 2010-2011

Pre-RN Licensure Programs in Louisiana

- In 2011, there were a total of 26 pre-RN licensure programs in Louisiana; 1 diploma, 12 associate degree; and 13 baccalaureate degree programs. Nicholls State has phased out its AD program (last graduates reported on the 2009-2010 annual report) and OLOL College has submitted a letter of intent to develop a BSN program.
- Beginning in 2008, there has been a steady decline in the number of qualified applicants applying to Louisiana's pre-RN licensure programs dropping from 5,110 applicants in 2008 to 4,705 in 2011 (8% decrease in the last 4 years).
- More qualified students applied to Associate Degree programs in 2011 (2,393) than Baccalaureate programs (2,221), but more students were admitted to Baccalaureate programs (1,741) than Associate Degree programs (1,466).
- Since 2008, there has been a 12% decrease in the number of students admitted to Louisiana's only diploma program, a 10% decrease in admits to Associate Degree Programs and no movement up or down in the number of students admitted to baccalaureate programs.
- Since 2008, there has been a 16% increase in the number of qualified applicants denied admission to Louisiana's pre-RN licensure programs.
- The top four reasons identified by Louisiana's pre-RN licensure programs as to why qualified applicants are not admitted has remained unchanged: 1) limited budgeted faculty positions; 2) limited number of qualified faculty; 3) non-competitiveness in faculty salaries; and 4) lack of clinical specialty sites.
- There was a 13% decrease in the number of males enrolled in Pre-RN licensure programs in 2011 compared to a 9% increase in 2010.
- The racial make-up of students enrolled in Louisiana's pre-RN licensure programs in 2010-2011 was 67% White, 24% Black, 3% Hispanic, 2% Asian and 4% Other, which reflects a 6% increase in the number of Whites enrolled, a 3% decrease in Blacks, a 11% decrease in Hispanics, an 18% increase in Asians and a 52% increase in Other Race students.
- Baccalaureate programs produced 51% of the graduates from pre-RN licensure programs, followed by 48% from Associate Degree programs and 1% from the Diploma program.
- The number of graduates from baccalaureate and diploma programs decreased by 9% and 23% respectively, while the number of graduates from Associate Degree programs increased by 18% between 2010 and 2011.
- In 2011 there were a total of 2,294 RN candidates sitting for the National Council Licensure Examination for Registered Nurses (NCLEX-RN) exam with 2,082 passing on the first take resulting in a 90.76% pass rate for the state which exceeded the national pass rate of 87.90.

Advanced Practice Registered Nurse Education in Louisiana

- There are seven Graduate Nursing Programs in Louisiana offering a degree as an Advanced Practice Registered Nurse (APRN). Six of the seven programs offer the Nurse Practitioner (NP) role; four the Clinical Nurse Specialist (CNS) role; and two the Certified Registered Nurse Anesthetist (CRNA) role. There are currently no programs offering the Certified Nurse Midwife (CNM) role in Louisiana.
- Over the past year there has been an overall decline in the number of students enrolled in Louisiana's APRN programs. Between 2010 and 2011 there was a 3% decrease in the number of students enrolled in Louisiana's NP programs, a 72% decrease in those enrolled in CNS programs, and a 29% decrease in those enrolled in CRNA programs.
- Over the past year there has been a 33% decrease in the number of male students enrolled in Louisiana's APRN programs.
- The racial make-up of students enrolled in Louisiana's APRN programs is 72% White, 23% Black, 2% Hispanic, 2% Asian, and 1% Other race.
- In the 2010-2011 report year, there was a total of 279 graduates from Louisiana's APRN programs. The majority of those graduates were from NP programs (72%) and CRNA programs (26%). Two-percent (6) of the APRN graduates were from CNS programs.
- In the current report year (October 16, 2010 thru October 15, 2011) 262 candidates successfully passed their certification exams resulting in a 97% passage rate for the state.

Non-Licensure Graduate Nursing Programs: Nursing Education and Nursing Administration

- Six of the seven Graduate Nursing Programs in Louisiana offer a Masters Degree in Nursing Education, and Nursing Administration.
- Currently, LSBN does not have jurisdiction over graduate nursing programs that lead to the Masters in Nursing Education and Nursing Administration.
- Of the 883 students admitted to graduate nursing programs across Louisiana, 579 (66%) were admitted to APRN programs, 271(31%) were admitted to Nursing Administration programs, and 33 (4%) were admitted to Nursing Education programs in the 2010-2011 report year.
- Of the 1,424 students enrolled in graduate nursing programs across the state, 875 (61%) were enrolled in APRN programs, 494 (35%) were enrolled in Nursing Administration programs, and 55 (4%) were enrolled in Nursing Education programs during the 2010-2011 report year.
- Between 2010 and 2011, there was a 22% decrease in the number of students enrolled in graduate nursing education programs and a 13% decrease in the number enrolled in nursing administration programs.
- The racial make-up of students enrolled in non-licensure graduate nursing programs in Louisiana is 68% White, 21% Black, 3% Hispanic, 3% Asian and 5% Other race.
- In the current report year there were a total of 222 graduates from Louisiana's nonlicensure graduate nursing programs which represents a 12% decrease from the previous report year. The majority of the graduates (194) were from Nurse Administration programs and 28 were from Nursing Education programs.

Faculty Teaching in Pre-RN Licensure Programs in Louisiana

- There were a total of 560 budgeted full-time nurse faculty positions reported by Louisiana's pre-RN licensure programs in 2010-2011 compared to 536 in 2009-2010 which reflects a 4% increase in the number of full-time budgeted positions.
- In 2011 there were more budgeted full-time faculty positions reported by pre-RN licensure programs when compared to the previous year (+24), but less full and part-time faculty employed (-17) which reflects a 2% decrease in the number of faculty teaching in Louisiana's pre-RN licensure programs.
- Sixty-four faculty positions were funded from grants, capitation funds, additional appointments, and/or other funding sources compared to 17 positions in 2010, a 276% increase.
- There were a total of 27 full-time vacant nurse faculty positions reported by Deans and Directors in the 2010-2011 report year, compared to 32 reported in the previous report year.
- A total of 82 new faculty appointments were reported by pre-RN licensure programs during the 2010-2011 report compared to 71 in the previous year which represents a 15% increase in the number of faculty appointments.
- The number of faculty exceptions requested by pre-RN licensure programs went from 56 in 2009, to 44 in 2010, and 40 in 2011, which represents a 29% decrease in the number of faculty exceptions utilized by pre-RN licensure programs over the last two years.
- 1,190 preceptors were utilized by pre-RN licensure programs during the current report year which reflects a 23% increase in the number of preceptors used by pre-RN licensure programs when compared to the previous year.
- During the 2010-2011 annual report year, a total of 15 faculty went on leave in comparison to 5 from the previous report year (a 200% increase).
- In 2010-2011 approximately 16% (122) of the faculty teaching in pre-RN licensure programs were prepared at the doctoral level, 79% (617) were Masters' prepared, and 5% (40) reported that their highest degree in nursing was a baccalaureate degree. This represents a 16% increase in the number of faculty prepared at the doctoral level, a 4% increase in those prepared at the Masters' level, and a 9% decrease in faculty prepared at the BSN level when compared to 2010.
- One hundred and fifteen (115) nurse faculty teaching in pre-RN licensure programs in Louisiana were recipients of the Board of Regents (BOR) Nurse Faculty Stipends, an increase of 10 nurse faculty when compared to the 2009-2010 report year. Due to statewide budget cuts to higher education, funds were not available for stipends for graduate nursing students during the 2010-2011 annual report year.
- Although there was an increase in mean salaries for all levels of faculty teaching in pre-RN licensure programs in Louisiana in the 2010-2011 report year when compared to the 2009-2010 annual report year, mean faculty salaries for Assistant Professors, Associate Professors and Professors in Louisiana still fall below the SREB mean for four year public colleges.

Faculty Teaching in Graduate Nursing Programs

- In 2010-2011 73% (105) of the faculty teaching in Louisiana's graduate nursing programs held an earned doctorate which reflects a 1% decrease from the previous report year.
- There were 54 filled full-time nurse faculty positions reported statewide by graduate nursing programs which reflects a 25% decrease in the number of filled full-time nurse faculty positions in Louisiana's graduate nursing programs since 2009-2010.
- A total of 20 faculty left their teaching positions in graduate nursing programs in Louisiana between 2010 and 2011 for one of the following reasons: approved paid or unpaid leave (5), resignations (9), and retirement (6). This represents a 33% increase in overall faculty attrition since 2010 a 400% increase in the number of faculty on leave and an 80% increase in faculty resignations.

NURSING SUPPLY: AVAILABLE RN NURSING WORKFORCE IN LOUISIANA 2010-2011

The Louisiana State Board of Nursing (LSBN) collects demographic information about Louisiana's registered nurse workforce as a component of the licensure renewal process. The target population for the nursing supply data for 2011 includes all registered nurses that held an active unencumbered license to practice as a registered nurse (RN) in Louisiana any time between February 1, 2011 and January 31, 2012. Descriptive analysis of the RN supply data, along with findings based on the analysis of the data, is being presented in the 2011 LSBN Annual Report. The raw data on which this report is based can be found in Appendix D.

Licensed Registered Nurses Residing in Louisiana

The Louisiana Nurse Practice Act requires annual license renewal for registered nurses. LSBN is the state appointed agency assigned to implement, regulate, and monitor the issuance of a license to practice as a RN in the state of Louisiana. In 2011, 57,788 nurses held a license to practice as a registered nurse (RN) in Louisiana. Of the 57,788 RNs holding a Louisiana license, 50,142 (87%) lived in Louisiana, while 7,630 (13%) reported home addresses outside of Louisiana. Overall, over the past five years, there has been a 14% increase in the number of RNs holding a license to practice nursing in Louisiana, a 15% increase in the number of RNs licensed and residing in Louisiana, and a 4% increase in the number of RNs that do not reside in Louisiana but hold a license to practice in Louisiana (Table 33).

Report Year	# of Nurses holding an RN License in LA (Residing in LA)	# of Nurses holding an RN License in LA (Not Residing in LA)	Total # Nurses Holding a LA RN License

Employment Distribution of Licensed Registered Nurses Residing in Louisiana

The majority of RNs holding an active RN license in Louisiana reported full-time employment (74%), while 13% reported part-time employment. There has been a 11% increase since 2007 in the number of RNs that are working full-time and a 15% increase in the number that are working part-time. Over 4,000 RNs (4,366) reported that they were unemployed, which reflects a 6% increase in the number of unemployed RNs during the 2010-2011 report year when compared to a 25% increase in the number of unemployed RNs reported during the 2009-2010 report year (Table 34). Nurses that were not employed indicated that they were either

unemployed and seeking a nursing position (1,460), seeking employment, but not in nursing (146), or not seeking employment at all (2,760).

Employers of Licensed Registered Nurses Residing in Louisiana

Although hospitals continue to be the primary employers of RNs in 2011, the percentage of RNs employed by hospitals went from 57% in 2010 to 56% in 2011. The number of RNs employed by hospitals did increase by 2% in the current report year compared to a 1% decrease in 2010 (Table 36). Since 2007, there has been an 88% increase in the number of RNs employed in physician's offices and a 60% increase in the number employed by long term care facilities. In addition to hospitals, employers showing the lowest growth in numbers of licensed RNs over the past year include Home/Community/Public Health (1%), Nurse Educators (1%), and School Nurses (3%). In 2011 there was a 9% increase in the number of RNs employed in clinic/ambulatory care settings in contrast to the 14% decrease in 2010.

Table 36. Field of Employment for Licensed Registered Nurses Residing in LA (2007-2011)

Age Ranges for Licensed Registered Nurses Residing in Louisiana

The average age for RNs licensed in Louisiana in 2011 is 44 years, whereas, nationwide the average age for RNs is 47 yrs (BHPr., 2010). There was a 12% increase in the number of licensed RNs that were less than 30 years of age, which is also the age category that had the greatest growth in numbers in 2010 (11% increase). Licensed RNs in Louisiana between the ages of 30 and 39 represented 27% of the RN workforce, followed by 22% that were 40-49. Twenty-six percent of licensed RNs were 50 years or older. RNs that were 60 and older continue to decrease in number reflected by a 3% decrease in 2011 and a 4% decrease in 2010. The two age groups with the greatest increase in numbers over the past five years were the youngest RNs (less than 30 years) and the oldest (60 years or greater) (Table 37).

 Table 37. Age Distribution of Licensed Registered Nurses Residing in LA ((2007-2011))

Gender of Licensed Registered Nurses Residing in Louisiana

In 2010, the gender distribution for the U.S. population was 49.2% males and 50.8% females, which does not differ significantly from that of the gender distribution for Louisiana which was 49% male and 51% female (2010 U.S. Census Bureau). Nationwide, males comprise approximately 6.2% of employed RNs who were licensed before 2000 and 9.6% of those licensed in 2000 or later (DHHS/HRSA, 2010). In Louisiana, males have consistently represented 11% of the RN workforce and females 89% (Table 38).

Ethnicity of Licensed Registered Nurses Residing in Louisiana

According to the U.S. Census Bureau (2010) minorities comprise approximately 36% of the U.S. population. In the U.S. Hispanics represent 16% of the population, Blacks 13%, Asians 5%, Native Americans 1%, and Native Hawaiians and other Pacific Islanders 0.2%. In Louisiana, Hispanics represent 4% of the population, Blacks, 32%, Asians, 2%, Native Americans, 0.7%, and Native Hawaiians and other Pacific Islanders, less than .01%. In 2011, the racial make-up of RN workforce in Louisiana was 80% White, 14% Black, 1% Hispanic, 1% Asian, .4% Native American, and .4% other race (Table 39). Hispanic RNs had the greatest growth in number over the past five years (42% increase in number).

Basic Educational Preparation of Licensed Registered Nurses Residing in Louisiana

In 2011, 46% of the RN workforce reported on their licensure renewal application that their basic educational preparation began at the baccalaureate degree or higher level, which is a 2% increase when compared to 2010 and a 13% increase over the previous five years. There was less than a 1% increase in the number of RNs reporting that their basic RN education began at the associate degree level, yet since 2007 there has been a 17% increase in the number RNs reporting the associate degree as their basic educational preparation. There continues to be a decline in the number of licensed RNs reporting their basic educational preparation at the diploma level (Table 40). In 2011, the question relative to initial preparation as a nurse at the vocational/practical level was added as an option in order to comply with the Forum for State Nursing Workforce

Center's minimum data set for nursing supply. Over one thousand RNs (1,181) reported Vocational/Practical Nursing as their basic nursing preparation.

Highest Degree Held by Licensed Registered Nurses Residing in Louisiana

For the purposes of the annual report and in order to make comparisons with the 2008 National Sample Survey of Registered Nurses conducted by Health Resources and Services Administration (HRSA), only those degrees that are in nursing, or a related field (i.e., doctorate in another field) will be included in the following discussion. According to the National Sample Survey of Registered Nurses (DHHS/HRSA, 2010), the highest degree reported by 13.9% of the U.S. RN workforce is the diploma, 36.1% the associate degree, 36.8% the baccalaureate degree, and 13.2% the Masters/Doctorate degree. In Louisiana, the highest degree held for 7% of the RN workforce is the diploma, 33% report the associate degree as being their highest educational preparation, 40% the baccalaureate degree and 9.5% the Masters/Doctorate which reflects minimal change from 2010 (Table 41). Louisiana continues to fall slightly below the nation in terms of the percentage of its RN workforce that is prepared at the baccalaureate or higher degree level (Louisiana-49.5%; U.S.-50%).

Members of the RN workforce possessing doctorates in nursing reflected a 17% increase between 2010 and 2011 and a 71% increase over the past five years. Types of doctorates in nursing included: PhD in Nursing (93), Doctorate of Nursing Practice (54), and Doctorate of Nursing Science or Doctorate of Science in Nursing (50). There has been a 59% increase in the number of licensed RNs holding a DNP since 2010 (Table 42).

Number of Years Licensed Registered Nurses Residing in Louisiana Plan to Work

In 2011, 7,296 nurses (15%) reported that they only plan to work an additional 0-5 years as an RN, which reflects a 6% increase since 2010. Nine thousand eight hundred and fifty-one RNs (20%) indicated that they plan to work 6-10 more years. Over one third (35%) of Louisiana's RN workforce plan to be in the workforce for 10 years or less (Table 43).

Positions Held by Licensed Registered Nurses Residing in Louisiana

Sixty percent (30,165) of RNs licensed in Louisiana in 2011 were employed as staff nurses. Approximately 9% (4,329) of the RN workforce were nurse mangers, 6% (3,104) advanced practice registered nurses, 3% (1,428) administrators, and 3% (1,525) indicated that they were instructors (Table 44). The positions showing the greatest growth in numbers overall for both the one year and five year mark were advanced practice registered nurses (\uparrow 8% and \uparrow 47% respectively) and instructors (\uparrow 8% and \uparrow 44% respectively). There continues to be a decline in the number of RNs serving as nurse administrators.

Table 44. Types of Positions Held by Licensed Registered Nurses Residing in Louisiana(2007-2011)

Major Clinical, Teaching or Practice Areas Reported by Registered Nurses Residing in Louisiana

The top five clinical, teaching or practice areas reported by RNs licensed and residing in Louisiana in 2011 were: 1) medical-surgical units (7,009); special care units/critical care areas (5,672); 3) operating room/post anesthesia care units (3,512); 4) emergency room (3,139); and 5) general practice/adult family health (2,966). Community/Public Health came in at number 6 (2,880), with a 17% increase in the number of RNs working in these types of clinical settings as compared to a 16% decrease in 2010. The number of RNs holding positions in maternal child health continued to decline in 2011 (\downarrow 5%) compared to a decrease of 16% in 2010 (Table 45).

 Table 45. Major Clinical, Teaching or Practice Areas Reported by Licensed Registered

 Nurses Residing in LA (2007-2011)

Licensed Registered Nurses Residing in Louisiana Providing Direct Patient Care in 2011

Nurses are the single largest component of the health care workforce and they provide the majority of direct care to patients (Institute of Medicine Report on the Future of Nursing, 2011; National Advisory Council on Nurse Education and Practice, 2008). This is true not only for the nation, but also for Louisiana. The majority of RNs licensed and residing in Louisiana in 2011 (81%) reported that they provided direct patient care in their practice, which is a 3% increase from 2010 (Table 46).

RNs Residing in Louisiana	No. of RNs Providing Direct Patient Care	Total No. Licensed RNs	% of Total RNs Providing Direct Patient Care	No Answer
2011	40,647	50,142	81%	771
2010	39,576	48,298	82%	486
1 Year Variance	13%

 (2010-2011)

Salaries from Positions held as a Registered Nurse Living in Louisiana

Of the 37,148 RNs licensed and residing in LA in 2011 that reported working full-time, 47% (17,498) reported annual salaries between \$50,001.00 and \$75,000. Twenty-one percent of the full-time RN workforce reported receiving annual salaries between \$35,001 to \$50,000. There was a 6% increase in the number of RNs working full-time reporting annual salaries between \$15,001 and \$25,000 which is in direct contrast to the 40% decrease reported in 2010. Approximately 65% of the fulltime RN workforce residing in LA reported salaries between \$50,001.00 and \$100,000 (Table 47a). Annual salaries greater than \$100,000 dollars were reported by 6% of RNs working full-time in 2011, an increase of 1% when compared to 2010.

Note: There were 37,148 Licensed RNs residing in Louisiana working full-time in 2011.

Approximately 6,484 RNs licensed and residing in LA reported that they worked part-time in 2011. Thirty one percent (1,983) of the RNs working part-time reported salaries of \$25,000 or less, 21% (1,393) reported annual salaries between \$25,001 and \$35,000.00, 29% (1,878) between \$35,001.00 and \$50,000.00, and 12% (757) indicated they had annual part-time salaries of \$50,001 to \$75,000 (Table 47b). Annual part-time salaries greater than \$100,000 were reported by less than 1% of RNs working part-time.

Advanced Practice Registered Nurses

There has been a 30% increase in the number of APRNs holding a license to practice in Louisiana since 2007. The number of APRNs licensed and residing in Louisiana has increased by 34%, while the number of licensed APRNs residing outside of Louisiana has increased by only 3% over the previous five years (Table 48).

Roles of Advanced Practice Registered Nurses Employed and Residing in Louisiana

In 2011, 55% (1,966) of all APRNs licensed and residing in Louisiana were nurse practitioners, 35% (1,191) were Certified Registered Nurse Anesthetists, 4% (156) were Clinical Nurse Specialists, and 0.6% (23) were Certified Nurse Midwives. In contrast, 5% of licensed APRNs were not employed as APRNs. This number has increased by 41% over the past 5 years. There has been a 55% increase in the number of NPs licensed and residing in Louisiana between 2007 and 2011 and a 12% increase between 2010 and 2011. Certified Nurse Midwives, although small in number, decreased by 18% between 2010 and 2011 and the number of Clinical Nurse Specialist licensed and residing in Louisiana decreased by 1% during the same time period (Table 49).

Report Year	Nurse Practitioner	CNM	CRNA	CNS	Not Employed as an APRN	No Response	Total

NURSING SUPPLY: AVAILABLE RN NURSING WORKFORCE IN LOUISIANA

Major Findings

- In 2011, 57,788 nurses held a license to practice as a registered nurse (RN) in Louisiana which reflects a 4% increase in the number of nurses licensed to practice in Louisiana over the last year and a 15% increase over the previous 5 years.
- Of the 57,788 RNs holding a Louisiana license, 50,142 (87%) lived in Louisiana, while 7,630 (13%) reported home addresses outside of Louisiana.
- 74% of RNs holding an active RN license in Louisiana reported full-time employment and 13% reported part-time employment.
- 4,366 RNs reported that they were unemployed, which reflects a 6% increase in number since 2010.
- There was a 17% increase in the number of licensed RNs indicating that some form of disability was their reason for not seeking employment and a 12% increase in the number of RNs citing home and family care as their major reason for not seeking employment.
- There was a 21% increase since 2010 in the number of licensed RNs that were retired.
- There was a 7% increase in the number of RNs indicating that they had difficulty finding a job during the current report year.
- Although hospitals continue to be the primary employers of RNs in 2011, the percentage of RNs employed by hospitals went from 57% in 2010 to 56% in 2011.
- Since 2007, there has been an 88% increase in the number of RNs employed in physician's offices and a 60% increase in the number employed by long term care facilities.
- The average age for RNs licensed in Louisiana in 2011 was 44 years, whereas, nationwide the average age for RNs is 47 yrs (BHPr., 2010).
- The two age groups with the greatest increase in numbers over the past five years were the youngest RNs (less than 30 years) and the oldest (60 years or greater).
- Twenty-six percent of licensed RNs in Louisiana were 50 years or older in 2011.
- In Louisiana, males have consistently represented 11% of the RN workforce and females 89%. Nationwide, males comprise approximately 6.2% of employed RNs who were licensed before 2000 and 9.6% of those licensed in 2000 or later (DHHS/HRSA, 2010).
- In 2011, the racial make-up of RN workforce in Louisiana was 80% White, 14% Black, 1% Hispanic, 1% Asian, .4% Native American, and .4% other race. Hispanic RNs had the greatest growth in number over the past five years (42% increase in number).
- In 2011, 46% of the RN workforce reported that their basic educational preparation began at the baccalaureate degree or higher level, which is a 2% increase when compared to 2010 and a 13% increase over the previous five years.
- There was less than a 1% increase in the number of RNs reporting that their basic RN education began at the associate degree level in 2011, yet since 2007 there has been a 17% increase in the number RNs reporting the associate degree as their basic educational preparation.
- Over one thousand RNs (1,181) reported Vocational/Practical Nursing as their basic nursing preparation in 2011.

- Louisiana continues to fall slightly below the nation in terms of the percentage of its RN workforce that is prepared at the baccalaureate or higher degree level (Louisiana-49.5%; U.S.-50%).
- Members of the RN workforce possessing doctorates in nursing reflected a 17% increase between 2010 and 2011 and a 71% increase over the past five years.
- During the 2010-2011 report year, there has been a 59% increase in the number of licensed RNs holding a DNP.
- Over one third (35%) of Louisiana's RN workforce plans to be in the workforce for 10 years or less.
- The majority of RNs (60%) licensed in Louisiana in 2011 were employed as staff nurses.
- The positions held by licensed RNs showing the greatest growth in numbers overall for both the one year and five year mark were APRNs (18% and 147% respectively) and instructors (18% and 144% respectively). There continues to be a decline in the number of RNs serving as nurse administrators.
- The top five clinical, teaching or practice areas reported by RNs licensed and residing in Louisiana in 2011 were: 1) medical-surgical units; special care units/critical care areas; 3) operating room/post anesthesia care units; 4) emergency room; and 5) general practice/adult family health.

Advanced Practice Registered Nurses in Louisiana

- There has been a 30% increase in the number of APRNs holding a license to practice in Louisiana since 2007.
- In 2011, 55% (1,966) of all APRNs licensed and residing in Louisiana were nurse practitioners, 35% (1,191) were Certified Registered Nurse Anesthetists, 4% (156) were Clinical Nurse Specialists, and 0.6% (23) were Certified Nurse Midwives.
- There has been a 55% increase in the number of NPs licensed and residing in Louisiana between 2007 and 2011 and a 12% increase between 2010 and 2011.
- The number of licensed APRNs with prescriptive authority in Louisiana increased by 72% between 2007 and 2011, with a 14% increase noted between 2010 and 2011.
